

# Introducing Qball: Get everyone involved!

## HEAR AND BE HEARD

It's common for teacher to get frustrated when students don't listen, but it isn't always that they don't want to listen. Students need to hear speech up to two times the amount that an adult needs.

Classroom challenges for children include:  
Everything from air conditioning units, to classroom acoustics and layout can impact a child's ability to hear and learn

Quiet talkers

"Teacher's voice" – sore throats from having to talk all day

Sedentary students – activity (like throwing a ball) grows a better brain!

Qball helps reduce these everyday challenges students and teachers face. It helps manage classroom discussions and increases learning for students.

## **PLUG & PLAY**

The Qball is quick and easy to set up! Qball connects with most devices that have an auxiliary input. It's designed to work with most speakers, including:

- Existing classroom audio systems
- Bluetooth speakers
- Desktop computer speakers

## **ADD-ONS**

### **Covers:**

Customize your Qball! Add your school colors and logo or create your own fun, unique design. Or choose a pre-made cover by Qball.

### **Buddy Kit:**

Do you have a large group of kids that need to be heard? With the Q-Ball Buddy Kit, you get an extra microphone that syncs with your existing receiver to have twice the fun!

### **Presenter Microphone:**

This easy clip-on microphone makes presenting easy. Clip it on to be heard and amplify your voice on stage, in a classroom, and more!
