

Spring into STEM!

Qball

- *Great for all ages!
- *Helps with “teacher’s voice”, quiet students, and makes kids engaged in classroom discussions.

Snapino

- *For ages 12 and up
- *Enables students to build their own prototyping circuit design!

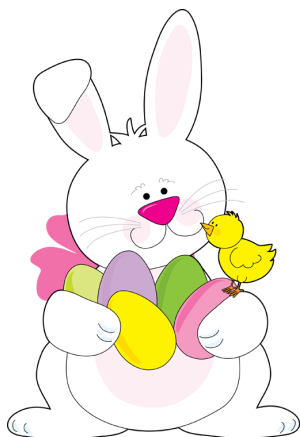

Mabot

- *For ages 6 and up
- *Allows kids to build, customize, and program robots! Mabot uses various shapes by splicing modules and creating different robots.

3Doodler Start

- *For ages 8 and up
- *Make anything into a 3D object! This product enables kids to create anything they want by drawing in the air.
